AMENDMENT

IN THE CLAIMS:

- (CURRENTLY AMENDED) A lug for fixing a vehicle window regulator, the lug comprising:
- a first part for fixing to a guide rail, the guide rail defining a window-guiding direction; and
- a second part <u>defining a single plane</u> for fixing to a vehicle body, the second part defining a plane, wherein a normal line is substantially perpendicular to the plane, and wherein the normal line is inclined relative to the window-guiding direction.
- (PREVIOUSLY PRESENTED) The lug according to claim 1, wherein the normal line is
 inclined at an angle of approximately 45° relative to the window-guiding direction.
- (PREVIOUSLY PRESENTED) The lug according to claim 1, wherein the first part and
 the second part are connected to each other by a connection that extends in a plane substantially
 perpendicular to a plane containing the window-guiding direction.
- (PREVIOUSLY PRESENTED) The lug according to claim 3, wherein the second part includes a hole for the passage of a member for fixing the lug onto the vehicle body.
- (PREVIOUSLY PRESENTED) The lug according to claim 4, wherein the hole is substantially oblong.

- (CURRENTLY AMENDED) A window regulator comprising:
 - a lug for fixing the window regulator, the lug including:
 - a first part for fixing to a guide rail, the guide rail defining a window-guiding direction; and
 - a second part <u>defining a single plane</u> for fixing to a vehicle body, the second part defining a plane, wherein a normal line is substantially perpendicular to the plane, and wherein the normal line is inclined relative to the window-guiding direction; and the guide rail having ends, wherein the guide rail carries the lug at one of the ends.
- (PREVIOUSLY PRESENTED) The window regulator according to claim 6, further including a window slide guided by the guide rail.
- (PREVIOUSLY PRESENTED) The window regulator according to claim 6, wherein the guide rail is a window runner.
- 9. (CURRENTLY AMENDED) A vehicle body comprising:
 - a window regulator including a lug for fixing the window regulator, the lug including:
 - a first part for fixing to a guide rail, the guide rail defining a window-guiding direction, and
 - a second part <u>defining a single plane</u> for fixing to a vehicle body—and defining a plane, wherein a normal line is substantially perpendicular to the plane, and wherein the normal line is inclined relative to the window-guiding direction;
 - the guide rail including ends, wherein the guide rail carries the lug at one of the ends; and
 - a bridge fitting for fixing the window regulator in a vehicle body.
- (PREVIOUSLY PRESENTED) The vehicle body according to the claim 9, wherein the bridge fitting includes a surface, and the normal line is substantially perpendicular to the surface.

- 11. (CANCELLED)
- (PREVIOUSLY PRESENTED) The lug as recited in claim 1, wherein the normal line and the window-guiding direction are non-parallel.

13-14. (CANCELLED)

- (PREVIOUSLY PRESENTED) The lug as recited in claim 1, wherein the second part is a planar portion.
- 16. (CANCELLED)
- (PREVIOUSLY PRESENTED) The window regulator as recited in claim 6, wherein the normal line and the window-guiding direction are non-parallel.
- 18. (CANCELLED)
- (PREVIOUSLY PRESENTED) The window regulator as recited in claim 6, wherein the second part is a planar portion.
- (CANCELLED)
- (PREVIOUSLY PRESENTED) The vehicle body as recited in claim 9, wherein the normal line and the window-guiding direction are non-parallel.
- 22. (CANCELLED)

23. (PREVIOUSLY PRESENTED) The vehicle body as recited in claim 9, wherein the second part is a planar portion.
